

PROJECT 2025'S

ECONOMIC IMPACT ON FAMILIES

Project 2025 is a 900+ page blueprint for Donald Trump's agenda should he win in November. **It would remove checks and balances to increase presidential power and to take control of the entire federal government.**

Project 2025 aims to:

- **Restrict the right to start and grow a family when financially able** by banning medication abortion nationwide and limiting access to birth control and IVF.
- **Eliminate Head Start Preschool**, widening the educational achievement gap.
- **Increase taxes by \$6,600/yr on middle class families** making \$100,000, while decreasing taxes for millionaires and billionaires.
- **Repeal caps on prescription drug prices.**
- **Drive up prices for everyday goods** by imposing expensive new tariffs and a national sales tax.
- **Drive up food prices even higher** by reducing legal immigration and triggering labor shortages in agriculture.
- **Drive up housing costs** by eliminating the State and Local Tax (SALT) deduction.
- **Eliminate consumer protections** put in place after the housing market collapse and financial crisis, and let lenders make risky loans again.
- **Erode health care access** by restricting Medicare and Medicaid eligibility and conditioning funding on compliance with anti-reproductive freedom agenda.
- **End Student Debt Relief** programs for millions.

Too many Americans haven't heard of Project 2025. But when they learn about it, they're against it.
So let's talk to everyone we know.
